What are AI Assessments?

- User friendly
- Unlock efficiencies
- Streamline processes
- Fully customisable
- Ready in minutes
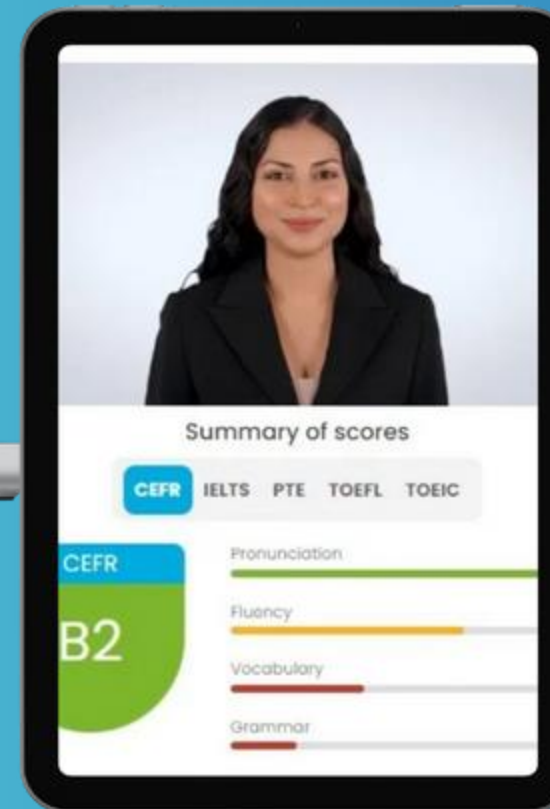

Multifunctional and Multilingual

Question 2: What inspired you to become a teacher?

Numeric

76.7/100

Pronunciation	88.9/100
Fluency	78.9/100
Vocabulary	81.1/100
Grammar	58.9/100

Fluency | Pronunciation   123 Words per minute ⓘ   ⏸ 0 bad pauses ⓘ

I think a mix of things inspired me to become a teacher. I've always loved learning and I realized how much I enjoyed helping others understand concepts and ideas.

Per question transcript and feedback

Question 1: Photosynthesis - a) Name the gas taken in during photosynthesis. b) Name the gas released during photosynthesis. c) State two factors that can limit the rate of photosynthesis.

Cue cards ⌃

$$6CO_2 + 6H_2O \sim C_6H_{12}O_6 + 6O_2$$

m2r edu

9/9   Task achievement   9/9

Fluency | Pronunciation   101 Words per minute ⓘ   ⏸ 2 bad pauses ⓘ

▶ The gas taken in during photosynthesis is carbon dioxide. The gas released during photosynthesis is oxygen. Two factors that can limit the rate of photosynthesis ⚠ are light intensity. And the ⚠ availability of carbon dioxide levels.

Why Use Oral Assessments?

Can you walk me through your previous ESL teaching experience — what age groups and proficiency levels have you worked with?

- Builds confidence

- Strengthens understanding

- Encourages real-world skills

- Fair & unbaised evaluations

- Instant feedback

AI English Language Assessments

English speaking evaluation & test creation platform

Accurately test your students' and employees' command of English with a cutting-edge **AI-powered English speaking & writing assessment** plus test creation platform.

Via an **AI-powered virtual interviewer**, a comprehensive learner evaluation on "pronunciation", "fluency" and "task achievement" is produced, that accurately forecasts test takers' scores on well-known exams like TOEIC® and TOEFL®.

Descriptive feedback

Overall (7)
Has reasonably good pronunciation with some accent. Demonstrates generally good fluency and coherence while speaking but may take occasional pauses. Is proficient in using sophisticated vocabulary and idiomatic structures. Proficient in expressing complex thoughts using a range of grammar structures.

Pronunciation (7.5)
Uses a wide range of pronunciation features. Sustains flexible use of features, with only occasional lapses. Is easy to understand throughout; First language accent has minimal impact on intelligibility.

Fluency (7.5)
Speaks fluently with only occasional repetition or selfcorrection; hesitation in speech is usually content-related and only rarely to search for vocabulary or grammatical constructs. Develops topics coherently and appropriately.

Vocabulary (6)
Has a wide enough vocabulary to discuss topics at length and make meaning clear in spite of inappropriacies. Generally paraphrases successfully.

Grammar (6)

AI Skills Based Assessments

Use AI to assess compliance

Health and safety compliance protects people, minimises risk and ensures **legal accountability**. It builds trust and reinforces a company's commitment to a safe, responsible workplace.

Create your own **compliance specific questions** for specific industry roles. You are in control to make sure you are fully compliant and have a workforce that can safely execute their functions.

Compliance

▶ 0:00 / 0:12   🔊 ⛶ ⋮

97 of 2048

Great! let's get started. My question is now presented on the screen: Please review the question.

Question 1   Short task achievement

Can you explain the purpose of a Permit to Work (PTW) system and give an example of when it would be used on an oi

Question 2   Short task achievement

What are the legal and company training requirements for working safely on an oil and gas site in Saudi Arabia?

Question 3   Short task achievement

Imagine you notice a gas leak while working. Walk me through the steps you would take in that situation.

Question 4   Short task achievement

What precautions must be taken before entering a confined space on-site? Can you describe the procedure and why

AI Powered Interviews

Improve efficiency, eliminate bias, save time.

Via your AI powered assessment platform, HR managers can create interview questions **specific to job roles and functions**, assessing specific skills and competencies, prior to arranging a more formal interview. Think of this as a **digital application form** where all information is captured using audio and video.

Minimise the impact of time zones, anti social hours and frustrating no shows when conducting interviews.
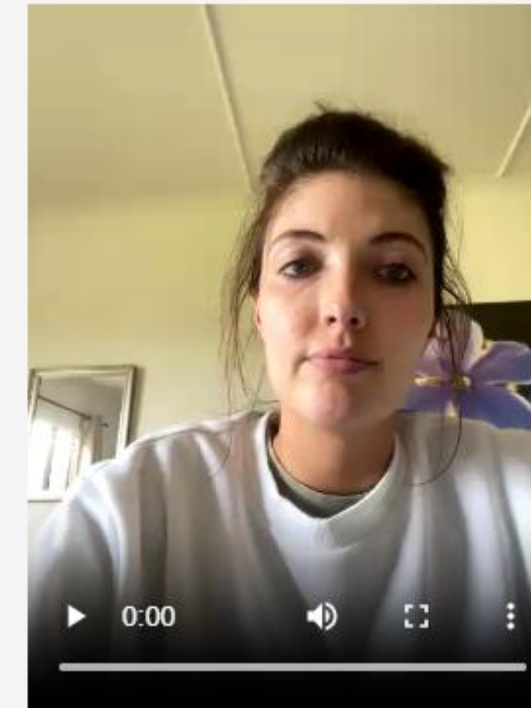

Technology Interview

DONE

Customer Service, Insurance Claims, Fault Diagnosis, Training Evaluation, the list is endless!

In Summary

Reducing Time and Costs

A virtual interviewer evaluates responses quickly and accurately. This significantly reduces costs, allowing businesses and educational institutions to focus more efficiently on their core operations and educational activities.

No Need for Interviewers

You can automatically dispatch an AI-based interviewer who can interact on your behalf. This alleviates the need of a skilled interviewer, making tests and administration simple and efficient.

No Need to Schedule Interviews

Candidates can take the test on their own, anytime, anywhere. This flexibility allows for easier administration for you and less stress for the test taker.
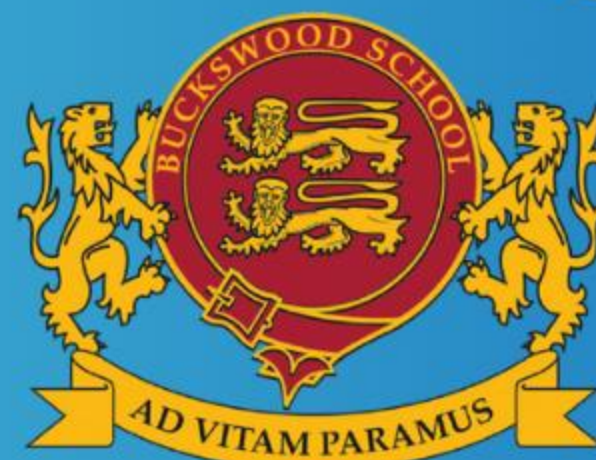

Fair Evaluations

AI technology reduces the evaluation bias that a human evaluator could have towards the recipient. Results become more reliable, enabling more efficient decision-making across all industry sectors.
